SWIMMING POOL ELEVATION WAIVER

For lots designed to have rear yard water retention, swimming pool decking shall be at the same elevation as the finished floor of the residence. For this purpose, the elevation of the swimming pool decking is considered to be at the water's edge. However, in certain instances, installing a swimming pool at this elevation may be objectionable to the homeowner. In such cases, the owner may be allowed to establish a lower elevation for the pool, providing the owner is willing to accept the full responsibility. To accomplish this, the owner shall complete, sign, and return this waiver form to the Development Services Department. Please be advised that by signing this form the owner assumes all responsibility related to the lowered elevation of the swimming pool and such action could subject the pool to flooding. (If the pool is in a yard not designed for retention, a waiver is not required.)
